

## Experience the Thrill of Flying with a \$99 Eagle Aircraft Discovery Flight

Combining instruction on the basics of flight with a hands-on 20-30 minute flight in a new Cessna 172 Skyhawk SP aircraft, an Eagle Aircraft discovery flight is an excellent introduction to flying lessons. Paired with a knowledgeable flight instructor, you will be briefed on how a pilot prepares an aircraft for flight. Guided by your instructor, you will take the controls and fly the airplane in logable flight time. After a memorable flight that might take you over your home, business, or the lakeshore, you and your instructor will return to the airport and discuss your flight. Serving as an introductory flying lesson, a \$99 Eagle Aircraft discovery flight steps you into the fun and exhilarating world of aviation. To schedule an unforgettable discovery flight, please call us at 219-464-0132, or fly by our flight school at the Porter County Airport. If you have been thinking of flying, then “stop dreaming...and start flying today!”

There's never been a better time to learn to fly. That's because [Cessna](#) has made becoming a pilot more accessible and fun, thanks to top-quality training tools, flight schools, and airplanes.

The [Cessna](#) program is the only integrated flight-training program in existence – flight and ground school lessons are designed by educational experts to work together for maximum retention. According to [Cessna](#) research, these higher retention rates and faster learning may lead to lower course completion times.

Flight training is a lot easier than you may think. You don't have to be a commercial or military pilot to fly. You can join the thousands of people just like you in the field of general aviation.

As a [Cessna Pilot Center](#), Eagle Aircraft offers the latest innovation in flight and ground training – a multimedia, computer-based instruction program which lets each student learn at their own pace in their own home or office.

At Eagle Aircraft, we offer the most comprehensive flight training program from sport pilot, private pilot's license through advanced instrument, multi-engine, commercial, and instructor ratings. Our staff of certified flight instructors and aviation professionals can customize your flight training program to meet your aviation goals and needs.

You can also earn your ratings in less minimum flight time required, since our Private Pilot, IFR, and Commercial Courses are [FAA Part 141 approved](#).

**You've always dreamed of soaring the skies....**

**“Stop dreaming and start flying today!”**

You can start training at any age but you must be at least 16 years of age to receive a student pilot certificate, which allows you to solo and at least 17 years of age when you finish your training and take your FAA practical test.

**Sport Pilot Certificate** – You must receive a minimum of 20 hours of flight training, including a minimum of 5 hours of solo flight time and 35 hours of ground training.

**Private Pilot Certificate** – You must receive

a minimum of 35 hours of flight training, including a minimum of 20 hours of solo flight time and 35 hours of ground training.

**Instrument Rating** – You must hold at least a private pilot certificate, have a minimum of 35 hours of flight time with an approved instrument instructor and 30 hours of ground training.

**Obtaining a commercial pilot's license enables one to pursue a full or part-time career in aviation or simply getting above and beyond life on the ground.**

If you would like more information or would like to take a Discovery Flight (Hands-on first flight lesson) give us a call or stop in. (219) 464-0132
